Email: hasanisbest786@gmail.com

Availability: Remote · US/UK/EU Hours Overlap

PROFESSIONAL SUMMARY

Senior Software Architect and Full-Stack Consultant with deep technical expertise in architecting and shipping production-grade web platforms and cross-platform mobile clients. Direct engineering partner to international founders, startups, and luxury enterprises across the US, UK, and Europe, delivering complex MVPs to market in rapid 4–6 week agile sprints. Specializes in sub-second latency Next.js 14 platforms (99+ PageSpeed standard), locked 60 FPS Flutter mobile apps, multi-agent AI orchestration with vector similarity search, and interactive 3D WebGL experiences with 100% Figma fidelity.

TECHNICAL COMPETENCIES MATRIX

FRONTEND & WEB

Next.js 14 (App Router, Server Actions), React.js, TypeScript, Tailwind CSS, Three.js, GSAP, HTML5, PostCSS, Turbopack, Vite

MOBILE ARCHITECTURE

Flutter 3.24, Dart, BLoC / Provider Pattern, SQLite Local Sync, Apple HealthKit, Google Health Connect, Native Bridges, Skia Shaders

BACKEND & APIS

Python 3.12 (FastAPI), Node.js, Express, Go, RESTful APIs, Server-Sent Events (SSE), WebSockets, Microservices, Task Workers

DATABASES & CLOUD

PostgreSQL, pgvector, Supabase, Redis (In-Memory Cache & Pub/Sub), ClickHouse, Docker, Vercel Edge, AWS, GitHub Actions CI/CD

PROFESSIONAL EXPERIENCE

Lead Full-Stack & Mobile Engineer / Technical Consultant · Independent Practice

2022 – PRESENT

- Architected and launched 15+ production web and cross-platform mobile applications for venture-backed startups and luxury brands across the US, UK, EU, and UAE, shortening delivery timelines by up to 50%.
- Engineered enterprise Next.js 14 web platforms featuring server components, edge routing, dynamic currency conversion, and static generation, consistently achieving 98–100 PageSpeed scores.
- Constructed production cross-platform Flutter applications on iOS and Android featuring locked 60 FPS telemetry charts, offline SQLite synchronization, and biometric session security for 48,000+ daily active users.
- Built autonomous multi-agent AI orchestration backends using Python FastAPI, hierarchical pgvector similarity search, and SSE token streaming, sustaining sub-18ms time-to-first-token (TTFT).
- Enforced senior engineering standards with 100% intellectual property transfer, automated CI/CD pipelines, containerized Docker deployments, and weekly staging review demos.

FLAGSHIP ARCHITECTURAL CASE STUDIES & LIVE DEPLOYMENTS

LIVE PRODUCTION

Next.js 14 · Tailwind · UPI Gateway · Vercel Edge

LIVE PRODUCTION

Next.js 14 · Dynamic FX · GIA API · Editorial UI

AI MULTI-AGENT

FastAPI · Python 3.12 · pgvector · Redis · Docker

CROSS-PLATFORM
MOBILE

Flutter 3.24 · Dart · BLoC · SQLite · Skia Shaders

FINTECH NEOBANK

Flutter 3 · Plaid API · AES-256 · Firebase Auth

3D WebGL Viewport

Three.js · WebGL 2.0 · Custom GLSL · Next.js
